

2019 MANRRS BLM INTERNSHIP PROGRAM

Location: Idaho Falls, ID – Upper Snake Field Office

Job Title: Outdoor Recreation Planner, GS 0023

Related Degree: Recreation, Social Sciences, Natural Sciences, Forestry, Outdoor Education, Conservation

Position Description:

The South Fork of the Snake River is one of the most used resources in Eastern Idaho, drawing in a diverse public land user base for various recreational activities. Every summer, thousands of visitors make use of their public lands, and BLM staff are eager to provide them with the best experience possible. This effort, however, can not be undertaken without a properly sized staff to oversee and carry out the various day to day tasks, and to observe consumer trends to improve upon the program. Improvement efforts have been in effect for several years, from adopting a fee system for river sites to collecting data for capacity studies through interagency efforts.
